INSTALLING LINUX

Linux Installation

Install Ubuntu

After creating your VM, you are now ready to install Ubuntu 20.04.

If using physical hardware, the ISO file must be copied to a USB device of the appropriate size. This [Ubuntu Tutorial](#) shows all the steps to create a bootable USB.

Start the Linux installation process. Regardless if you are booting from a bootable USB or a virtual disk connected to an ISO file, the installation process is the same for installing Ubuntu.

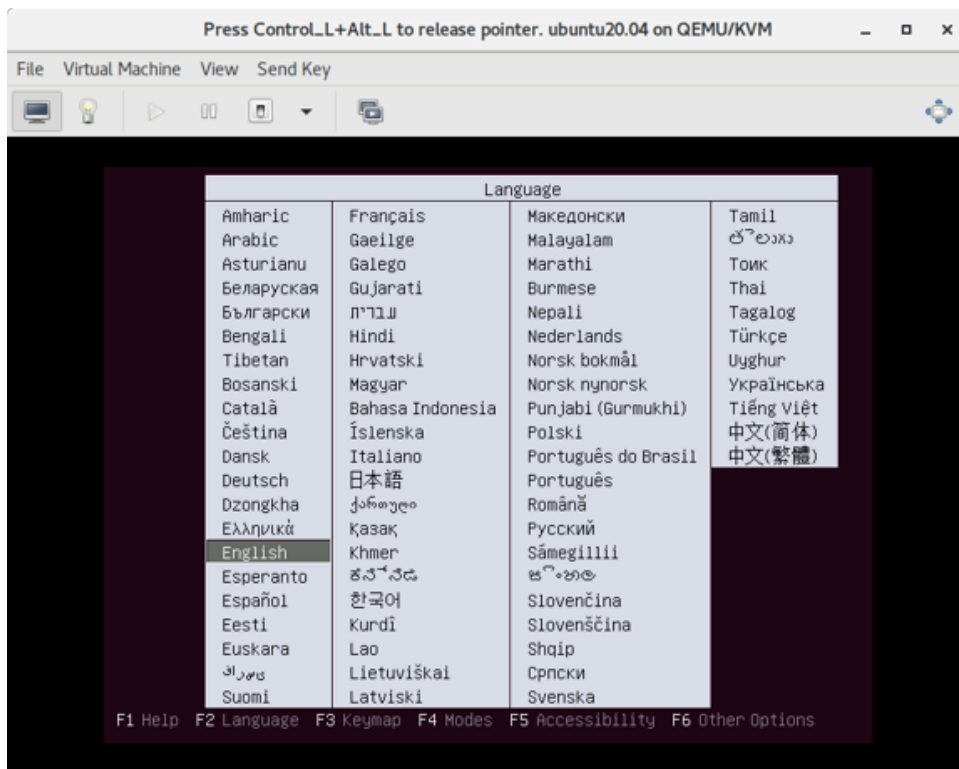

Select "Expand" to learn the steps to install Ubuntu.

Steps to Install Ubuntu

Select Language for Installation Process

Close ^

The initialization of the install program will prompt you to choose the desired language for the installation process.

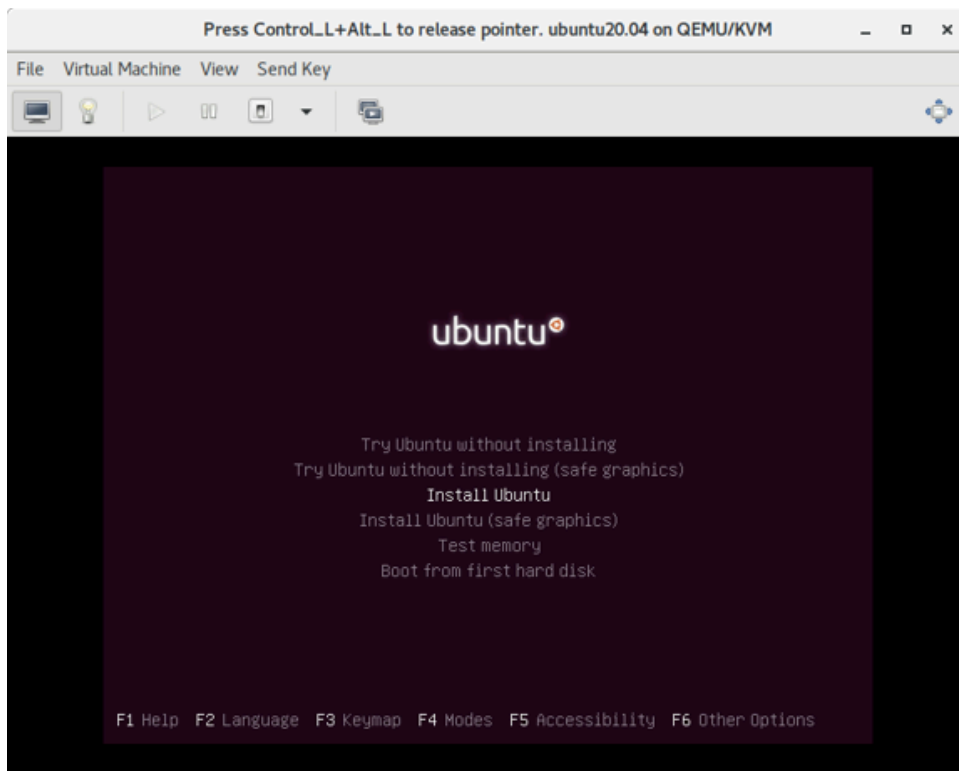

Screenshot of Ubuntu Installation: Selecting the Language for Installation Process

Select "Install Ubuntu"

Close ^

Next, select "*Install Ubuntu*" from the available options.

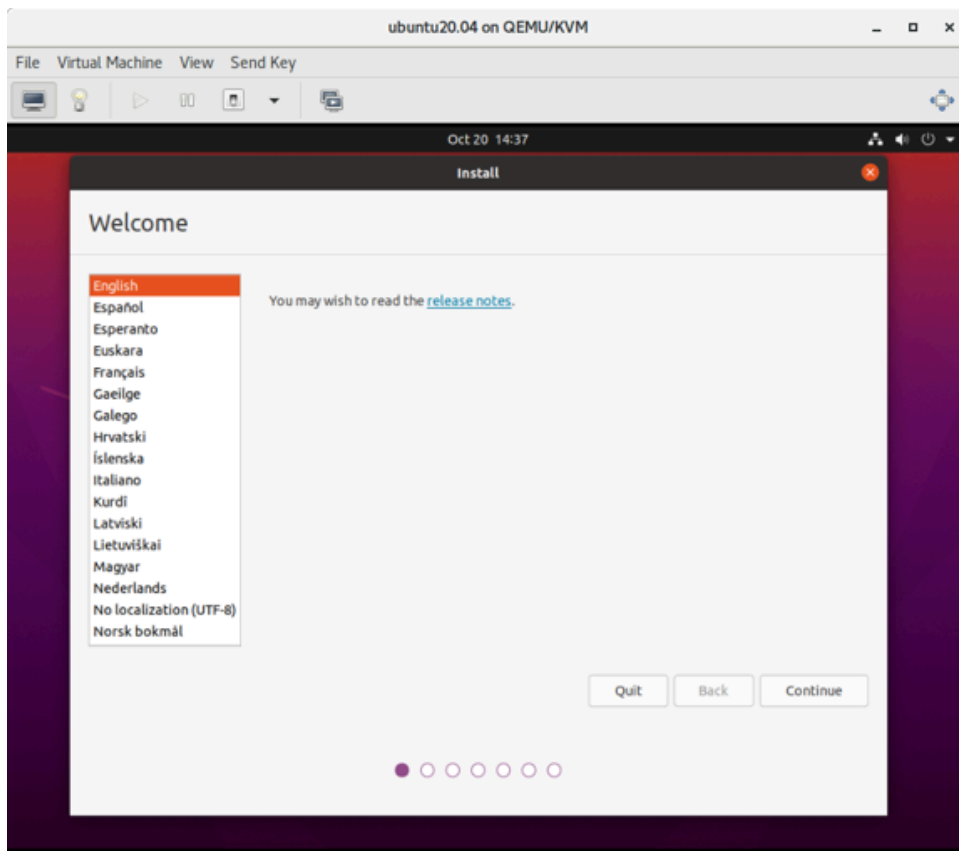

Screenshot of Ubuntu Installation: Select *"Install Ubuntu"*

Select System Language

Close ^

Select the language you want to have on the system that is being installed. Then, select *Continue*.

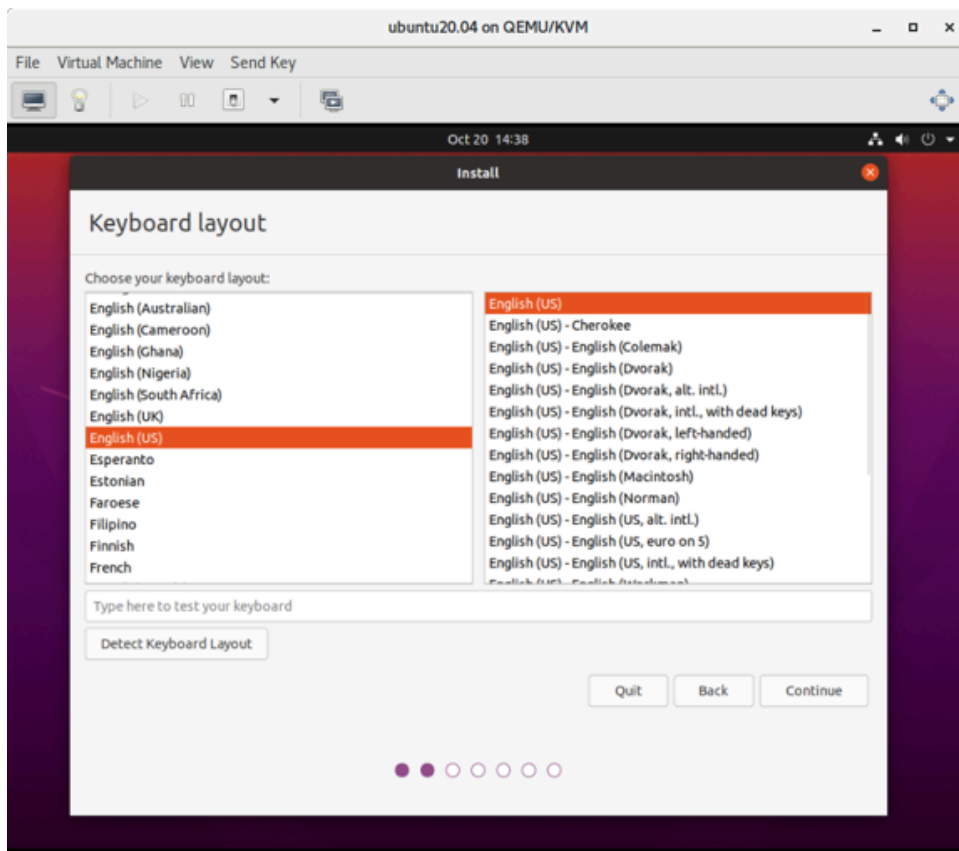

Screenshot of Ubuntu Installation: Select the System Language

Select Keyboard Layout

Close ^

Now, you must select the desired keyboard layout. Select *Continue*.

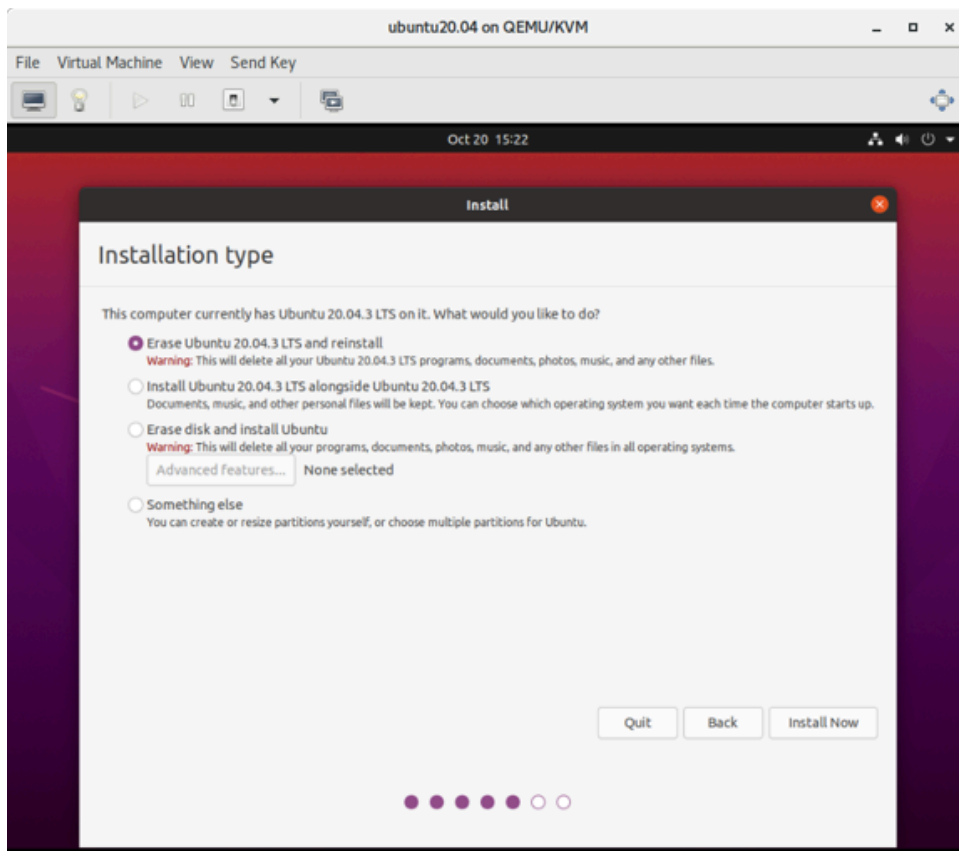

Screenshot of Ubuntu Installation: Select Keyboard Layout

Select Installation Type

Close ^

Next, select the installation type: *Minimal* or *Normal*. We are using *Normal* in this instance.

It is typical to apply updates during install. In this case, deselect updates, as they will be applied in a later section. If the disk has been used previously for another purpose, select to erase and reinstall. Select *Install Now*.

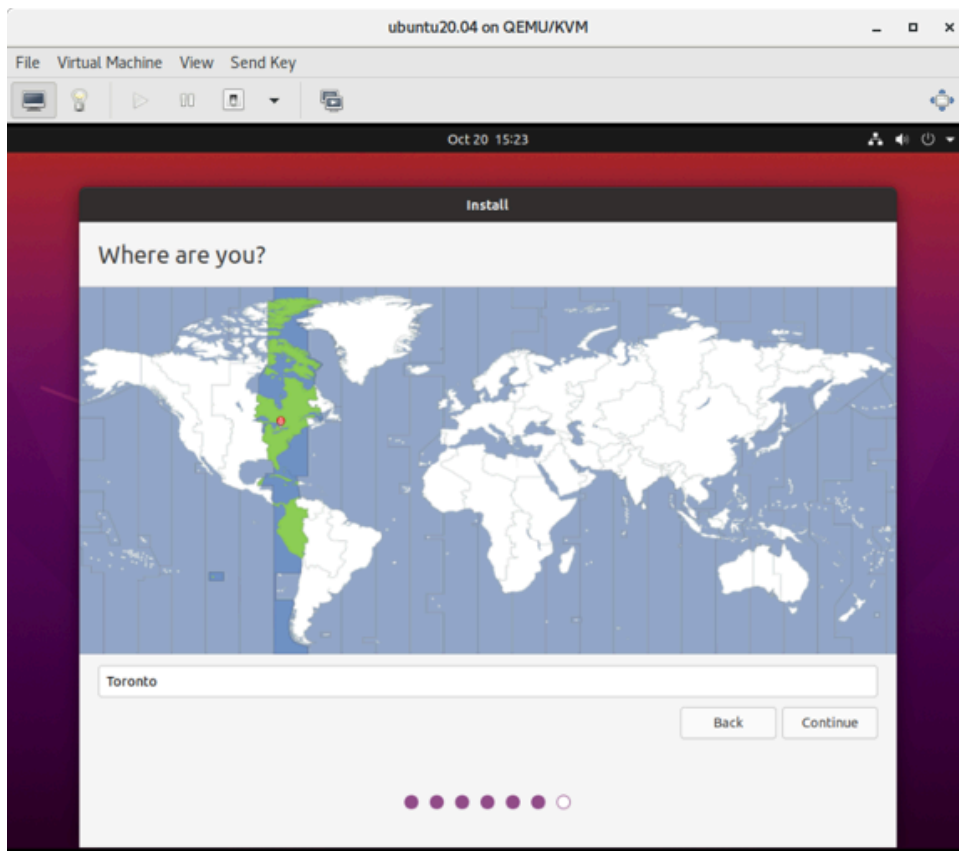

Screenshot of Ubuntu Installation: Select Installation Type

Select Timezone

Close ^

Now it's time to choose the desired timezone. Then, select *Continue*.

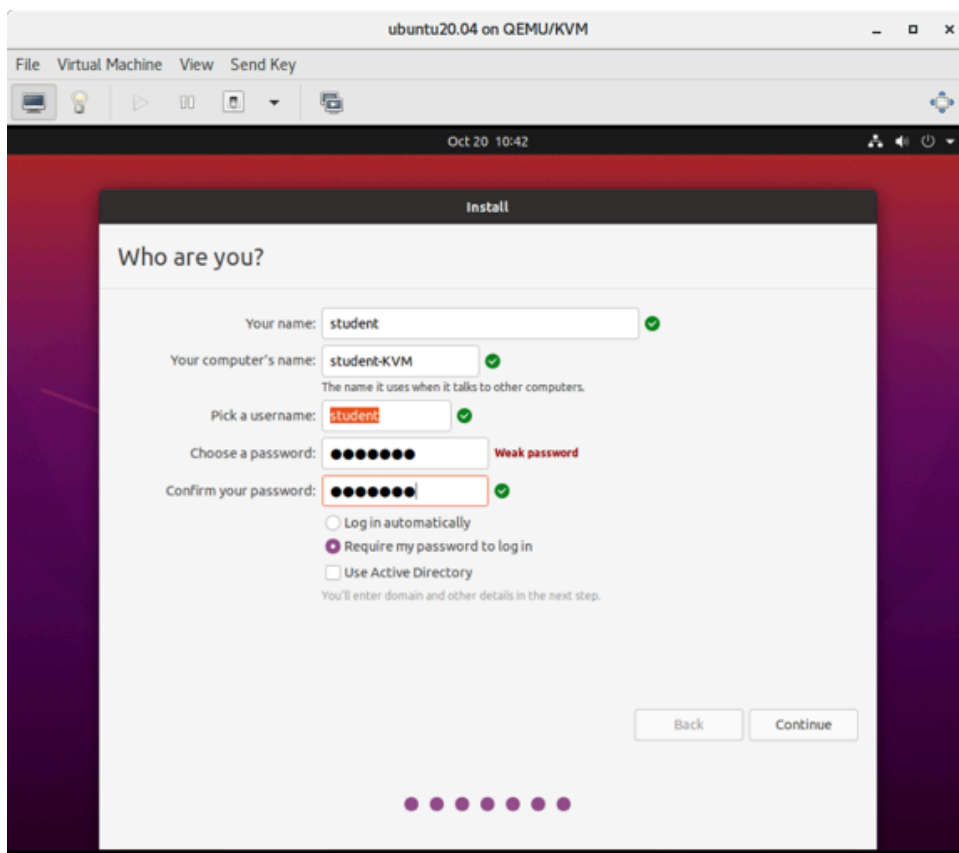

Screenshot of Ubuntu Installation: Select Timezone

Add Hostname & User ID

Close ^

Add your hostname and user ID. Select *Continue*.

Installing...

Close ^

The installation begins.

This is a great opportunity to take a break, as the process will take a while!

Restart

Close ^

Once the installation process completes, it will ask you to restart your computer. Select *Restart Now*.

Screenshot Showing Ubuntu Installation Complete

Congratulations!

Close ^

Once your computer restarted, log in. You will see the default desktop.

Congratulations on successfully installing Ubuntu!
